Homework # 8

Due: Friday Dec 7, 2018 at 5 pm

Part I: Theory & Practice

1. Read Chapter 9

2. Practice Problems: P9.1, P9.6, P9.12, P9.13, P9.16 (not collected)

Part II : Programming

3. Coding Exercise (50 points).

Using good coding practices, write a program that prompts the user for the name of a ".txt" text file, takes the contents of such file, and then saves them into another file titled "NewData.txt" .

Compile your code and run your program to check for compile-time errors and logic errors. Submit your header files and source codes to *ccle.ucla.edu.* Figure 1 shows a sample output for the given file.

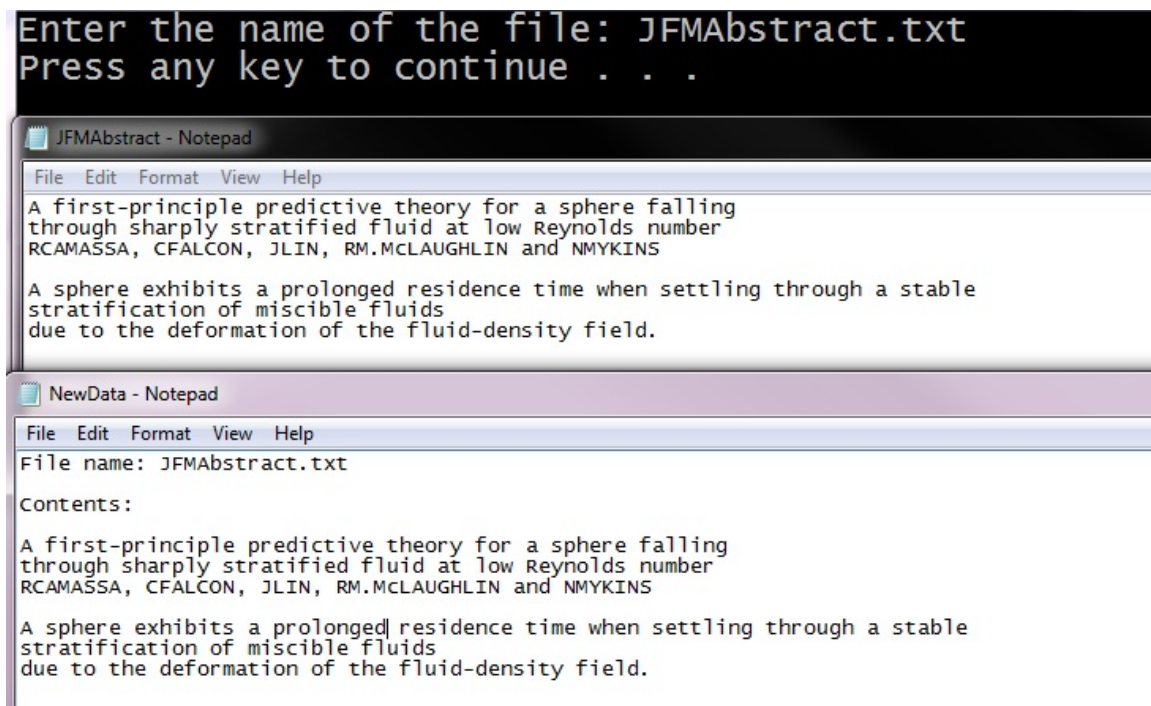

Figure 1: Sample console, input file "JFMAbstract.txt", and resulting output file "NewData.txt"
